Our Moto : WE DELIVER RESULTS

MCKEDRIK
WE DELIVER RESULTS

International Cooperation:

Mckedrik participates as an authorized supplier in the LOGI PROJECT, of the international logistics giant MSC

 OUR
COMPANIES

 m
sc
SICILIA

The story of MSC Sicilia is closely linked to the rise and expansion of the **Mediterranean Shipping Company (MSC)**. Today the company, established and led by Gianluigi Aponte, is the **world's first shipping line**, present in 155 countries, with 493 offices, 70,000 employees, 520 ships, 200 commercial routes calling at 500 ports and transporting over 21 million TEUs.

The experience of Logi Project and MSC Sicilia is consolidated and recognised worldwide and these two companies can rely on a highly efficient network, thanks to offices all across Sicily and connections with every Italian port.

In the field of renewable energy, the group works with some of the major wind turbine manufacturers, both onshore and offshore, such as Siemens, Gamesa and Vestas.

LogiProject brings together in one single company the experience of MSC Sicilia and the professionalism of Portitalia.

These are three established and successful firms in the **logistics and shipping market**, able to accompany your projects in wind energy from their first steps out at sea or on land up to their installation phase. These companies provide not only transport and launching services, but also **project design, analyses, surveys and authorisations**, ranging from port operations, construction and civil engineering works to internet interconnection.

 OUR
SUPPLIERS

 MCKEDRIK

This single player can **satisfy a large variety of activities**, working on economies of scale and enabling the acquisition of excellent services at advantageous prices.
